RE: District Email

Google Apps for Education is now fully functional in District 272, including email. We have migrated the District email to gmail. Please remember, even though we are using the gmail interface, your email address remains the same, for example: rhubbard@amboy.net. On Friday, August 12th at 3:00pm the migration to gmail began and was completed on Monday, August 15th at 6:00am. E-mail is no longer delivered to the Kerio Web Mail server, or other local email clients. Access to Kerio web mail will be terminated on Thursday, August 18th.

To access the Google apps and gmail go to our District web site www.amboy.net. On the left hand column is the link to our Google apps domain login. Click the link to load the login in box. Enter your user name username and password to login into Google apps. *Only enter your user name, not your complete email address (you do not need @amboy.net in the box)*. The initial login will require an additional step, a captcha. If you have logged in to Google apps previously, you will not have to do the captcha step.

A link for your district email is also located on the District 272 Staff Information page on the district website.

If you have any problems, please feel free to contact Rich Hubbard or Amy Wittenauer (815-973-3221).
