

# TEACHER

## Plan for Change/Personal Commitment

- Stop Stressing on time
- Ask Students more
  
- Stop stressing on time
- Research student's questions
  
- I am willing to support any educational changes that the district decides to implement. My only concern is sticking to the changes long term, and providing the support in making any changes work
  
- Better positive parent communication
  
- Talk less, help my students discover more
  
- I am willing to do things to better my students
  
- I will always commit to learning as much as possible to benefit our students at any level
  
- Always work to keep my student motivated and challenged
  
- I'm willing to learn more to do what's best for students
  
- Always be willing to learn more and do what is best for students
  
- Keep an open mind
  
- Allow a self guided study hall

- Need for more resources and partnerships with the community
- Become more problem based
- Research PBL and implement at one next year
- Try something
- Larger overall concept class/semester
- Making all material available to all students
- Letting students have more of a say in the curriculum they study
- Participate in educating community about the positives
- Put together projects that can be researched through physical activity
- Allow student to do more for themselves. Be accountable to themselves
- I believe my commitment to this idea is to continue to grow myself as a teacher and grow my beliefs into my fellow teachers. Much of what I do is projects based learning; students have a hard time catching on.
- Strive to locate additional project-based learning opportunities to use in the classroom
- Utilizing student peers more in teaching
- Giving more freedom to explore change
- I am willing to change to better our students
- My commitment to change is teaching a self-paced classroom.
- I LOVE IT!
- I will look for projects based learning ideas
- I will try to introduce more open-ended projects into my classroom
- Already do this in some respects-where students are challenged more or less on their ability
- I commit to doing the work it will take to teach one of the self-paced classes. I am passionate about personalized learning
- Take 1 unit already used and turn it into a self-paced unit

- Try to tape myself teaching in order to allow students to work at their own pace
- I am committed to change. Lets implement to student-paced learning, I have several kids in my classroom that would love to see this
- Stay positive
- Continue to do what I do as a teacher of Vocational Education
- Project based assessments that require students to create their own understandings of subject matter
- I like the idea of putting all “units” like for students access to possibly start a self paced atmosphere
- More projects less “clear” expectations to inspire thinking
- Adapting myself to change, as I am a traditionalist
- I will try to include more projects in my lessons. Also I will try to use higher students to help tutor the lower students
- Plan more open ended projects
- Be able to get students motivated based on interest
- Let go of some control in the classroom
- Allow students more time to think critically: don’t give them everything, let them figure it out
- I need to be more open to change and relax when things appear to be chaotic
- In my classroom I hope to incorporate self-pacing with materials and instruction I am already using
- Allow for more time for student discussion/project based learning
- Focus on main concepts, not all concepts
- I need to organize and create activities and checklists to get the class more individualized and student driven
- More research
- Create
- Stop stressing on time
